Errata *Introduction to Fluid Dynamics in Physics and Astrophysics*

Hendrik van Eerten

January 5, 2026

This is a list of typos found in the book after publication. If you are confident you have spotted another typo, you can let me know at `hjve20bath.ac.uk` and I will gratefully include it in this list.

p. 32 The third entry of the first transposed vector on the RHS (i.e. ∇) is incorrect. The vector should read $\begin{bmatrix} \frac{\partial}{\partial x} & \frac{\partial}{\partial y} & \frac{\partial}{\partial z} \end{bmatrix}$

p. 32 The sentence directly following Equation 2.8 should read: "No inner or **cross** product [..]". This is exactly the mistake footnote 5 on page 8 warns about.

p. 151 Equation 8.31 should have γ^2, not γ in the top right entries for $\begin{bmatrix} T^{\alpha\beta} \end{bmatrix}$ on the RHS (the tensor is symmetric, and top right should match bottom left).

p. 297 The second "density" in the answer to (iv) from Exercise 7.3 should have been "pressure".
